FOR IMMEDIATE RELEASE

PHYSICIANS AND SURGEONS AMATEUR GOLF ASSOCIATION (PSAGA) ANNOUNCES ITS LAUNCH

Chicago, IL - June 20, 2023 – The Physicians & Surgeons Amateur Golf Association (PSAGA), the premier organization celebrating the golfing abilities of medical professionals nationwide, is thrilled to announce its official launch. The PSAGA offers an exclusive platform for physicians and surgeons to showcase their golf skills under competitive tournament conditions, acknowledging their prowess on the green alongside their professional expertise.

PSAGA's dual mission extends beyond the typical golf club. The association not only fosters high-level golf competition among physicians but also supports professional development through its novel integration of Continuing Medical Education (CME). In doing so, PSAGA enables members to advance their medical knowledge and skills while indulging in their love for golf.

The competitive spirit of PSAGA is unparalleled. Physicians will vie for the honor of being the best golfer in their specialty and across the nation. Specialty-specific tournaments provide opportunities to compete at various levels, resulting in a challenging yet inclusive golfing environment. Extensive media coverage of these events will be shared with specialty and medical societies to showcase the most exceptional golfers to their communities. Dates and locations for the 2024 Healing Greens Amateur Tour will be announced in early 2024.

The creator of PSAGA, Wendy J. Weiser, a recognized leader in association management for nearly four decades, understands that the fast-paced life of physicians can often leave little time for leisure activities or additional learning opportunities. To address this, PSAGA has streamlined the process of obtaining CME credits by integrating them into the golfing experience. This innovative approach allows members to unwind and compete on the golf course without compromising their professional commitments. "The goal is to create an exciting and supportive community for physicians that love golf and to find out who is the best among them," says Weiser. "PSAGA is the first of its kind, truly making PSAGA the premier member organization for avid golfers who are also physicians and surgeons. Our members can enjoy the competition, improve their golfing skills, and enhance their medical knowledge all at once."

Physicians of all golfing levels are welcome to join the PSAGA Community. Players will compete against others with similar abilities, ensuring an inclusive and exhilarating experience for everyone.

Membership is now open, and membership is free. Don't miss out - Swing into action with PSAGA and find your place among the champions! For more information and to apply for membership, visit <https://www.psgolf.org>

About Physicians and Surgeons Amateur Golf Association (PSAGA)

PSAGA is a premier membership organization for physicians and surgeons who are passionate about competitive amateur golf. Its unique platform enables members to connect, unwind, earn CME credits, and compete for top golfing honors in their specialties and nationwide. Our mission is to foster golf competition and professional development among physicians across specialties, making PSAGA an exciting and inclusive community for all physicians with a passion for golf. PSAGA aims to answer what medical specialties reign supreme on the golf course and to celebrate who among them will earn the best golfer in medicine - every year.
